

File Reference: .gitignore

A file-specific explanation covering purpose, owner layer, metadata, source details, implementation signals, source excerpts, and safe-change rules.

Item	Explanation
File	.gitignore
Category	Documentation or text control file
Folder role	Repository root. Usually an entry file, app config, public website file, package manifest, or top-level documentation.
Size	118 bytes
Extension	(none)
MIME type	text/plain
Text lines	10

Why this file exists

- Git ignore rules for build outputs, temporary files, and local-only data that should not be committed.
- This keeps temporary build output, local-only data, and generated noise out of version control.

How it is used

Repository root. Usually an entry file, app config, public website file, package manifest, or top-level documentation.

Readable content snippet

```
1: node_modules/  
2: dist/  
3: .vs/  
4: .env  
5: .env.*  
6: .dev.vars  
7: .wrangler/  
8: projects.local.json  
9: .omb-publish-session.json  
10: .omb-backups/
```

Safe change checklist

- Confirm which app, website, installer, workflow, or document consumes this file.
- Change it on a feature branch from development.
- Regenerate docs if the file purpose, API surface, or behavior changes.
- Run the smallest relevant smoke test before merging into development.
