

File Reference: .nojekyll

A file-specific explanation covering purpose, owner layer, metadata, source details, implementation signals, source excerpts, and safe-change rules.

Item	Explanation
File	.nojekyll
Category	Documentation or text control file
Folder role	Repository root. Usually an entry file, app config, public website file, package manifest, or top-level documentation.
Size	1 bytes
Extension	(none)
MIME type	unknown
Text lines	1

Why this file exists

- Tells GitHub Pages not to process the site with Jekyll, so folders and static files publish exactly as generated.
- This makes GitHub Pages serve static files directly without Jekyll filtering.

How it is used

Repository root. Usually an entry file, app config, public website file, package manifest, or top-level documentation.

Safe change checklist

- Confirm which app, website, installer, workflow, or document consumes this file.
- Change it on a feature branch from development.
- Regenerate docs if the file purpose, API surface, or behavior changes.
- Run the smallest relevant smoke test before merging into development.
